

TAX ME! (IF YOU CAN!)

Around the world, the question of how to tax extreme wealth is at the heart of intense economic and political debates. While proponents argue that reducing taxation stimulates economic growth and attracts investment, opponents fear it will deepen inequality and erode essential public services. This documentary explores both sides of the argument, examining how tax policies have evolved and how the wealthiest individuals legally optimize their tax burden. Through exclusive access to policymakers, economists, tax lawyers, and high-net-worth individuals—including both proponents and opponents of wealth taxation—the film presents a balanced, in-depth look at the mechanisms that shape modern tax systems. From financial hubs to international institutions, we investigate the key players, the arguments that fuel this global debate, and the potential consequences of policy shifts on economic growth, inequality, and financial stability.
